Trust me: Childnet has created a resource which is designed to support teachers in exploring critical thinking online.

The 'Trust Me' resource has been created with teachers in mind after hearing from schools that they wanted a resource which would start the conversations around extremism and extreme online content.

The main aim of this resource is to educate young people around inaccurate and pervasive information that they might come across online. This resource is by no means a solution to the issues that are facing young people online but is intended to stimulate and facilitate discussions around online risk. Primary and secondary pack available.
